Abstract: This article explores modern approaches to teaching grammar in English as a Foreign Language (EFL) classrooms. It highlights the shift from traditional, rule-based methods to communicative, task-based, and technology-enhanced strategies. The paper reviews recent studies, categorizes current methods, and analyzes their effectiveness in fostering both accuracy and fluency. Findings suggest that an eclectic approach combining communicative tasks, inductive-deductive techniques, and digital tools enhances learner motivation, reduces grammar anxiety, and improves long-term retention. The study concludes that adopting innovative methods can make grammar instruction more learner-centered and effective in diverse educational contexts.

Key words: grammar teaching; communicative approach; task-based learning; inductive and deductive methods; technology-enhanced learning; EFL/ESL pedagogy; learner-centered instruction; modern approaches.

Annotatsiya: Ushbu maqolada ingliz tili chet tili sifatida o'qitiladigan (EFL) sinflarda grammatikani o'qitishning zamonaviy yondashuvlari tahlil qilinadi. Unda an'anaviy, qoidalarga asoslangan metodlardan kommunikativ, topshiriqqa yo'naltirilgan va texnologiyalar bilan boyitilgan strategiyalarga o'tish jarayoni yoritiladi. Maqolada so'nggi tadqiqotlar ko'rib chiqiladi, hozirgi usullar tasniflanadi va ularning aniqlik hamda ravonlikni rivojlantirishdagi samaradorligi tahlil qilinadi. Tadqiqot natijalariga ko'ra, kommunikativ topshiriqlarni, induktiv-deduktiv uslublarni va raqamli vositalarni uyg'unlashtirgan eklektik yondashuv o'quvchilarning motivatsiyasini oshiradi, grammatika bo'yicha qo'rquvni kamaytiradi va bilimni uzoq muddatli eslab qolish samaradorligini yaxshilaydi. Xulosa sifatida, innovatsion metodlarni qo'llash grammatikani o'qitishni o'quvchiga yo'naltirilgan va samaraliroq jarayonga aylantiradi.

Kalit so'zlar: grammatika o'qitish; kommunikativ yondashuv; topshiriqqa asoslangan o'qitish; induktiv va deduktiv usullar; texnologiya bilan boyitilgan ta'lim; EFL/ESL pedagogikasi; o'quvchiga yo'naltirilgan ta'lim; zamonaviy yondashuvlar.

Аннотация: В статье рассматриваются современные подходы к обучению грамматике в классах английского языка как иностранного (EFL). Подчеркивается переход от традиционных, основанных на правилах методов к коммуникативным, заданийно-ориентированным и технологически обогащённым стратегиям. В работе анализируются недавние исследования, классифицируются существующие методы и оценивается их эффективность в формировании точности и беглости речи. Результаты показывают, что эклектический подход, сочетающий коммуникативные задания, индуктивно-дедуктивные техники и цифровые инструменты, повышает мотивацию учащихся, снижает тревожность, связанную с грамматикой, и способствует долговременному запоминанию. Делается вывод, что внедрение инновационных методов делает обучение грамматике более ориентированным на ученика и эффективным в различных образовательных контекстах.

Ключевые слова: обучение грамматике; коммуникативный подход; обучение на основе заданий; индуктивные и дедуктивные методы; обучение с использованием технологий; методика EFL/ESL; обучение, ориентированное на учащегося; современные подходы.

INTRODUCTION

Grammar has always been considered the foundation of language learning because it provides the structural framework that supports effective communication. Without grammar, learners may acquire vocabulary but struggle to use it accurately or meaningfully. Traditionally, grammar teaching was dominated by prescriptive and rule-based approaches, where learners memorized grammatical structures and applied them through repetitive drills and written exercises. While this method ensured accuracy, it often neglected fluency, creativity, and communicative competence.

In the second half of the 20th century, a significant paradigm shift took place in language pedagogy. Influenced by Communicative Language Teaching (CLT) and socio-cognitive theories of learning, grammar

instruction began to focus more on meaning, context, and learner interaction. Approaches such as task-based learning and inductive methods encouraged students to infer grammatical rules from authentic texts and real-life situations rather than simply receiving rules from the teacher. These changes reflected a growing awareness that grammar should serve communication rather than exist as an isolated body of knowledge. In the 21st century, globalization, digital technologies, and learner-centered education have further transformed grammar teaching. Online platforms, mobile applications, and interactive tools now provide learners with immediate feedback, gamified practice, and greater autonomy. Moreover, the diversity of learner needs – ranging from academic to professional contexts – requires teachers to integrate grammar instruction into broader skill development rather than treat it as a separate subject. Despite these innovations, challenges remain. Teachers often struggle to balance accuracy with fluency, and students may experience grammar anxiety when confronted with complex rules. In many contexts, especially in English as a Foreign Language (EFL) settings, the choice of teaching approach is influenced by cultural expectations, classroom resources, and examination requirements. Therefore, finding an eclectic and flexible approach is essential for effective grammar teaching. This paper aims to analyze modern approaches to grammar teaching by reviewing current pedagogical trends and highlighting their practical implications for EFL classrooms. It argues that integrating communicative, task-based, and technology-enhanced strategies can make grammar instruction more engaging, learner-centered, and effective in preparing students for real-world communication.

RESEARCH METHODOLOGY

This study employed a qualitative literature review approach to investigate modern methods of grammar teaching. The review focused on research published between 2015-2025, reflecting the most recent developments in applied linguistics and pedagogy. Sources included peer-reviewed academic journals, conference proceedings, doctoral dissertations, and teacher-training manuals, which were systematically examined to identify relevant trends and practices. The selection of studies was guided by three primary criteria:

- relevance to grammar teaching methodologies – only studies that directly addressed grammar instruction, either theoretically or practically, were included;
- practical application in EFL/ESL classrooms – preference was given to research that reported on classroom practices, case studies, or pedagogical experiments in English as a Foreign or Second Language contexts;
- emphasis on learner outcomes and communicative competence – studies were selected if they evaluated the effectiveness of grammar instruction in terms of fluency, accuracy, motivation, or overall communicative ability.

The process involved three stages. Key databases such as ERIC, JSTOR, Scopus, and Google Scholar were searched using combinations of keywords including “grammar teaching,” “communicative grammar,” “task-based grammar,” “inductive grammar learning,” and “technology in grammar teaching.” The identified studies were screened for relevance, with outdated or unrelated publications excluded. Relevant studies were then categorized into four broad approaches: Communicative Grammar Teaching (CGT), Task-Based Grammar Teaching (TBLT), Inductive and Deductive Approaches, and Technology-Enhanced Grammar Teaching. Each category was analyzed to highlight its core principles, strengths, and limitations. The findings from these studies were compared to reveal overarching themes, emerging trends, and practical implications for teachers and learners. By synthesizing insights from a diverse range of sources, this methodology provided a comprehensive overview of how grammar instruction is evolving in contemporary EFL/ESL pedagogy.

ANALYSIS AND RESULTS

The analysis of selected studies revealed four dominant approaches to grammar teaching in modern EFL/ESL pedagogy. Each approach demonstrates distinct principles, strengths, and classroom applications, which are outlined below.

1. **Communicative Grammar Teaching (CGT).** Studies emphasized that CGT prioritizes meaning over form, situating grammar within authentic communication. Instead of isolated drills, grammar is introduced through dialogues, discussions, and real-life texts. Learners gain both fluency and accuracy simultaneously, as grammar becomes a natural component of meaningful interaction. Research showed that this approach reduces learners' anxiety and fosters long-term retention of structures.

2. **Task-Based Language Teaching (TBLT).** Evidence highlighted the effectiveness of task-based activities such as role plays, interviews, and problem-solving tasks. Grammar is acquired indirectly while learners complete communicative tasks. This method increases motivation, learner autonomy, and retention, as students focus on achieving communicative goals rather than memorizing rules. TBLT was found to be especially effective for intermediate and advanced learners, where fluency development is a priority.
3. **Inductive and Deductive Approaches.** Findings confirmed that both inductive (discovery-based) and deductive (rule-based) methods remain central to grammar instruction. Inductive approaches encourage learners to infer rules from examples, supporting critical thinking and deeper understanding. Deductive approaches, where teachers present rules first, proved useful for beginners who need clarity and guidance. A blended approach that combines both methods was consistently reported as the most effective, allowing teachers to adapt instruction to different learner needs and proficiency levels.
4. **Technology-Enhanced Grammar Teaching.** The integration of digital tools has significantly changed grammar instruction. Mobile applications, gamified learning platforms, interactive quizzes, and corpus-based tools offer learners immediate feedback, personalized practice, and opportunities for self-directed learning. Research indicates that technology-enhanced grammar teaching not only improves learner engagement but also promotes autonomy and individualized learning paths. In addition, gamification and multimedia resources reduce grammar anxiety and make learning more enjoyable. Combining communicative tasks with digital resources was found to improve learner engagement, reduce grammar anxiety, and enhance long-term retention.

The findings of this review suggest that grammar teaching has undergone a substantial transformation, shifting away from mechanical, form-focused drills toward more integrated, learner-centered approaches. While traditional rule-based instruction continues to play a role in ensuring grammatical accuracy, it is no longer sufficient as a standalone method. Modern approaches, such as communicative grammar teaching and task-based learning, emphasize authentic use of language, enabling learners to develop both fluency and accuracy in meaningful contexts. Similarly, technology-enhanced instruction provides learners with greater autonomy, instant feedback, and opportunities for interactive practice, which are critical in 21st-century classrooms. Despite these positive developments, several challenges and limitations must be acknowledged. First, the effective implementation of modern methods requires well-trained teachers who are capable of integrating communicative and technology-driven strategies into their lessons. In many EFL contexts, including Uzbekistan, teachers may still rely heavily on traditional rule-based methods due to limited training or institutional expectations. Second, technological resources are not equally available across all schools and regions, which can create disparities in access to modern approaches. Third, striking a balance between accuracy and fluency remains a complex issue. While communicative and task-based approaches foster natural language use, they sometimes risk neglecting grammatical precision, which may be critical for academic or professional contexts. Another important point is the cultural and contextual dimension of grammar teaching. In many educational systems, examinations still prioritize grammatical accuracy, leading teachers to emphasize deductive and rule-based methods despite the proven effectiveness of communicative approaches. Therefore, a flexible, eclectic methodology that combines rule-based instruction with communicative, task-based, and technology-enhanced practices is essential. Future research should prioritize empirical, mixed-method studies conducted in diverse multilingual contexts. In particular, research in Uzbekistan and similar settings could provide valuable insights into how blended approaches affect learner outcomes, motivation, and long-term retention. Such studies would not only enrich the theoretical understanding of grammar pedagogy but also offer practical guidance for teachers and curriculum designers.

CONCLUSION

The review of recent literature demonstrates that grammar teaching in EFL/ESL contexts is no longer limited to traditional rule-based instruction but is increasingly shaped by communicative, task-based, and technology-enhanced approaches. Each method contributes unique advantages:

- rule-based teaching ensures accuracy;
- communicative and task-based strategies foster fluency and motivation;
- while technology-driven methods provide autonomy and interactive practice.

However, none of these approaches alone is sufficient to address the diverse needs of learners. Therefore, an eclectic approach that combines elements of different methodologies is the most effective way forward. By integrating communicative practice with explicit instruction and digital resources, teachers can balance

accuracy and fluency, reduce grammar anxiety, and prepare learners for authentic, real-world communication. Future directions should involve empirical classroom research that examines how blended approaches work across varied cultural and educational contexts, especially in multilingual environments like Uzbekistan. Such studies will provide practical insights for teachers, curriculum developers, and policymakers, ultimately making grammar instruction more dynamic, learner-centered, and effective.
